Railing Systems for Landscaping

Hollaender’s® railing systems have been installed in parks and public places across the United States. Where drawings are not available, our Speed-Rail® system can be shipped as a “kit of parts” to be built on-site. Interna-Rail® railing systems are shipped assembled and offer a more “architectural” appearance.

Landscape market needs:
- For exteriors, railing must be corrosion resistant
- Low maintenance cost, robust
- Easy to install
