PANELGRIP® 2 DRY GLAZE SYSTEM FOR STRUCTURAL GLASS RAILINGS

A dry glaze system that is truly cost effective and unique in its simplicity.

Advantages of Dry Glaze vs. Wet Glaze:

- Broken lites of glass are much easier to remove and reinstall from dry glaze than from wet glaze.
- On angled/raked railing shoe in particular, dry glaze has a shorter installation time.
- Eliminates multiple cement pours, waiting for cement to cure, messy clean up.

Advantages of PANELGRIP® 2 vs. Other Dry Glaze Systems:

- NO SPECIAL TOOLS – all you need is a standard Allen wrench.
- Material cost is less than most other dry glaze systems.
- Broadest grip range of any dry glaze system – will accept ½" to 13/16" thick monolithic and laminated glass.

PANELGRIP® 2 BASE SHOE AND MECHANISM ARE SOLD AS A SYSTEM AND ARE SUBJECT TO ONE OR MORE OF THE FOLLOWING PATENTS:
US7730682, NZ581456, EP2171180, AU 2008282693
