Re: Buy America Act Requirements & LEED Requirements

Hollaender Manufacturing has been proudly manufacturing and fabricating railing in the United States since 1946. Materials provided by Hollaender are designed, engineered and manufactured in the United States and meet all procurement requirements for materials intended for public use within the United States.

A large portion of products manufactured by Hollaender Manufacturing can be claimed as LEED credits because Hollaender's Speed-Rail® fittings are manufactured from cast aluminum ingot, and are extremely high in post-consumer recycled content. The amount of credit can vary based on geography of the project, but you can find more information at:

www.architecturalrailing.hollaender.com/technical/leed-certification/
