

FIRST INTERNET BANK

Fishers, Indiana

Architect: Browning Day

Contractor: Spohn Associates

QUAD™ with Glass • Interna-Rail® with Pickets • Button Mount Glass • Smoke Baffles

The Indianapolis, Indiana, based offices of Browning Day and specialty railing contractor, Spohn Associates, collaborated to create an amazing architectural designed space for the First Internet Bank in Indianapolis, Indiana. The project required over 3,500 linear feet of railing and incorporated a veritable plethora of Hollaender railing designs.

The feature railing was **Hollaender's VUE™** post-mounted glass system with **QUAD™** posts, black anodized finish, and stainless-steel assist rail. The rectangular **QUAD™** posts and top cap melded perfectly with the chic and minimalist design woven throughout the building.

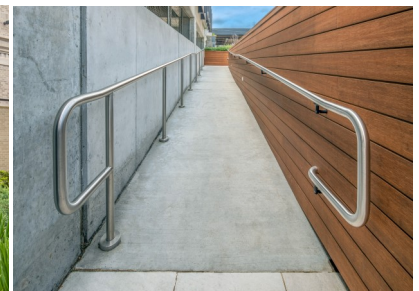

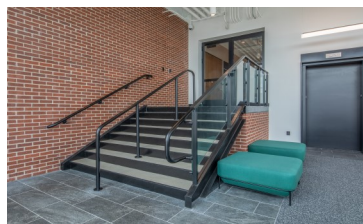

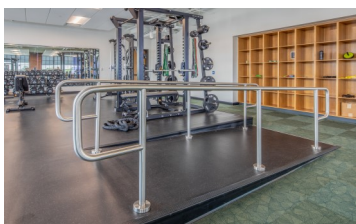

In addition to the captivating glass design, Hollaender provided 3-Line **Interna-Rail®** with picket infill in matching black anodized finish as well as button-mounted 13/16" SGP glass with U-channel top cap and glass smoke baffle.

The buildings design incorporated outlook balcony areas with brick parapet walls, but they required guardrails in order for them to meet IBC guardrail codes. The architect team wanted to provide a safe rooftop environment and maintain the sweeping views, so Hollaender's Stainless Steel Button Mounts with 13/16" SGP glass and stainless steel U-channel top cap were specified and installed.

Hollaender's ability to design and fabricate railing in both stainless steel and aluminum, coupled with the multiple infill options, made Hollaender the perfect choice for this ambitious project. When discussing Hollaender's ability to provide all the railing designs required for the project, Eric Spohn, President of Spohn Associates said, "The design team's decorative guardrail vision required several different materials, configurations, finishes and infills. Hollaender was certainly up to the task. Their team provided monumental grade quality and performance to a challenging project for FIB and the construction team."
